

IR remote controller
SIR-15

SRP-457

- ❑ process meter in tight, wall mounting case, **IP 67**
- ❑ 57 mm LED display
- ❑ inputs: 0/4-20 mA, 0/1-5V, 0/2-10V
- ❑ 1 REL / OC output
- ❑ power supply output: 24V DC
- ❑ RS-485 / Modbus RTU
- ❑ signal peak value detection
- ❑ free configuration software S-Config

The **SRP-457** digital meter is equipped with one measurement input with user selected range 0/4-20 mA or 0/1-5V, 0/2-10V and a standard resistor protection circuit. As a main advantage, this device is equipped with a large, 57 mm high LED display. Thanks to the tight housing with high (IP 67) protection degree, this device is particularly suitable for operations in harsh environments. Wide range of characteristic curves (linear, square root, quadratic, user-defined and volume characteristic for cylindrical tanks) allows the use of meters in various process control systems. The 24V DC / 100 mA output is designed to supply measuring transducers, and the RS-485 port enables data transmission in production process monitoring systems. The REL / OC control output can adjust the level of measured signal and are controlled according to one or two threshold values. The meter may be configured with no need to open the case, by using the remote controller or with free S-Config software via the RS-485 communication port.

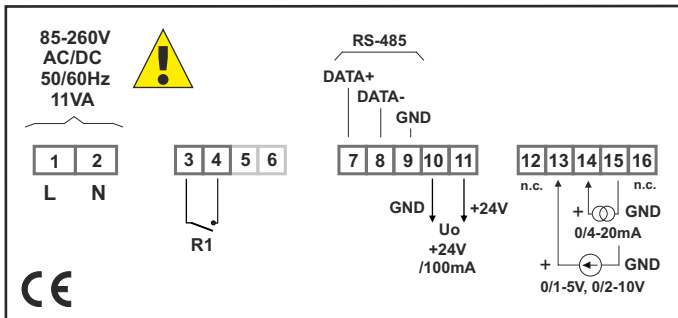

TECHNICAL DATA

Power supply / Power consumption	19V ÷ 50V DC; 16V ÷ 35V AC or 85 ÷ 260V AC/DC, all separated for 19V ÷ 50V DC: max. 13,5 W; for 16V ÷ 35V AC: max. 19,5 VA; for 85 ÷ 260V AC/DC: max. 21 VA
Display	LED, red, 4 x 57 mm, with 8-step adjustment of brightness
Displayed values	-999 ÷ 9999 + decimal point
Input	current: 0-20 mA or 4-20 mA, programmable, input resistance < 65 Ω (typ. 55 Ω), overload-protected, input current limited to 40 mA; voltage: 0-5 V, 1-5V, 0-10V or 2-10V, programmable, input resistance > 50 kΩ
Accuracy	0.1% @25°C ± one digit (for 0-20 mA and 0-10 V range)
Stability	50 ppm/°C
Output	1 x REL $I_{max}=1A$, $U_{max}=30VDC/250VAC$ ($\cos\phi=1$) or OC $I_{max}=30mA$, $U_{max}=30VDC$, $P_{max}=100mW$
Power supply output	24V DC +5%, -10% / max. 100 mA, stabilized
Communication interface	RS-485, 8N1 and 8N2, 1200 bit/s ÷ 115200 bit/s, Modbus RTU (not galvanically isolated)
Operating temp.	0°C ÷ +50°C (standard), -20°C ÷ +50°C (option)
Storage temp.	-10°C ÷ +70°C (standard), -20°C ÷ +70°C (depending on option)
Protection class	IP 67
Case	wall mounting; material: ABS + glass fibre
Dimensions (WxHxD)	230 x 140 x 96,5 mm
Weight	1176 g max.

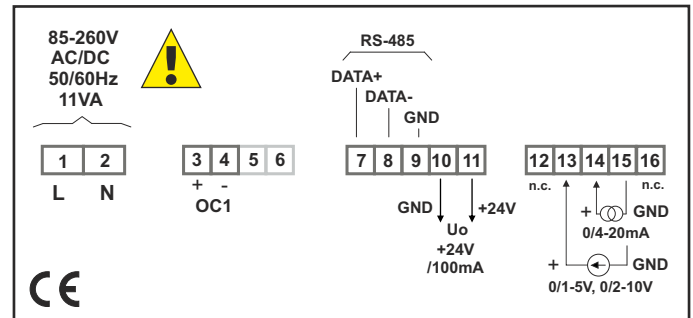

DIMENSIONS

EXAMPLARY PIN ASSIGNMENTS

version with 1 x REL

version with 1 x OC

ORDERING

SRP-457-181X-1-X-XX1

type of outputs:

- 1 : REL
- 2 : OC

options:

- 09 : no options
- OR : operating temp. -20°C ÷ +50°C

power supply:

- 3 : 24V AC/DC
- 4 : 85V - 260V AC/DC

REMOTE CONTROLLER

SIR-15

InfraRed remote controllers may be used as external programming keyboard for all SIMEX devices equipped with IR receivers and remote programming functions. Pressing of any local IR controller key, causes transmission of its code to the device. Functions of particular keys depend on devices features.

Power supply voltage: 6V DC - 4 alkaline batteries type LR44
 Operation range: from 0,5 to 5 m (depend on programmed device features)

SOFTWARE

S-Config 2 is used for the simultaneous detection of devices in multiple Modbus RTU networks and allows user to change the configuration of most of them. For each detected device a list of its registers, which the user can modify, is displayed and also additional informations about device parameters (type, address in the network, etc.).

S-Config software can be downloaded from SIMEX website at www.simex.pl

SimCorder Soft is a visualisation application created to facilitate work with advanced networks of the SIMEX devices, for acquisition, visualisation, reporting, archiving, exporting and printing of measurement data from all network devices. You can download measurements from the devices automatically or on demand. There is a possibility of immediate notification about emergency states via SMS or e-mail, which will often allow to quickly resolve an arising problem while avoiding long and expensive stoppages. You can view the measurement data, emergency states and configuration via the internet at every time.

CONVERTERS

The **SRS-U4** module is designed to connect a USB host to slave devices equipped with RS-485 interface. The PC with special software can be used as a host. The **SRS-U4** unit guarantees full galvanic isolation between USB and RS-485 circuits. The converter can work with any devices equipped with RS-485 interface and contains integrated circuit which supports USB 1.1 and USB 2.0 standards. The main purpose is connection of PC host computer with industrial data acquisition and visualisation systems based on RS-485 interface.

The **SRS-U4** can be also manufactured with DIN mounting adaptor.
